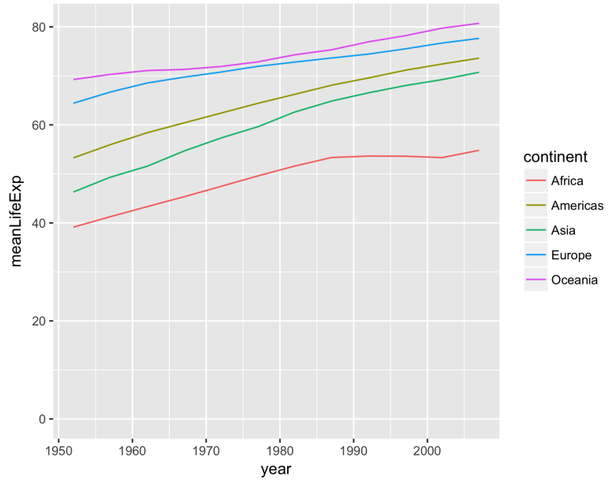
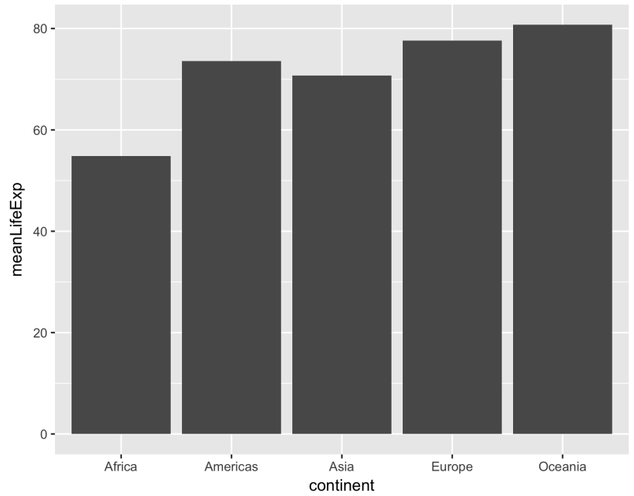
Types of plots

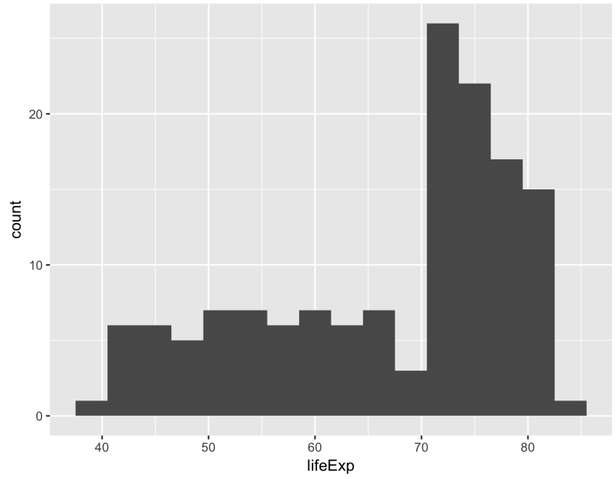
Line plot



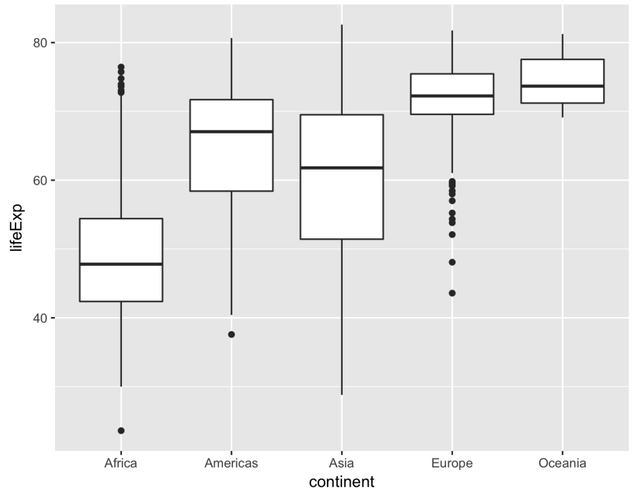
Bar plot



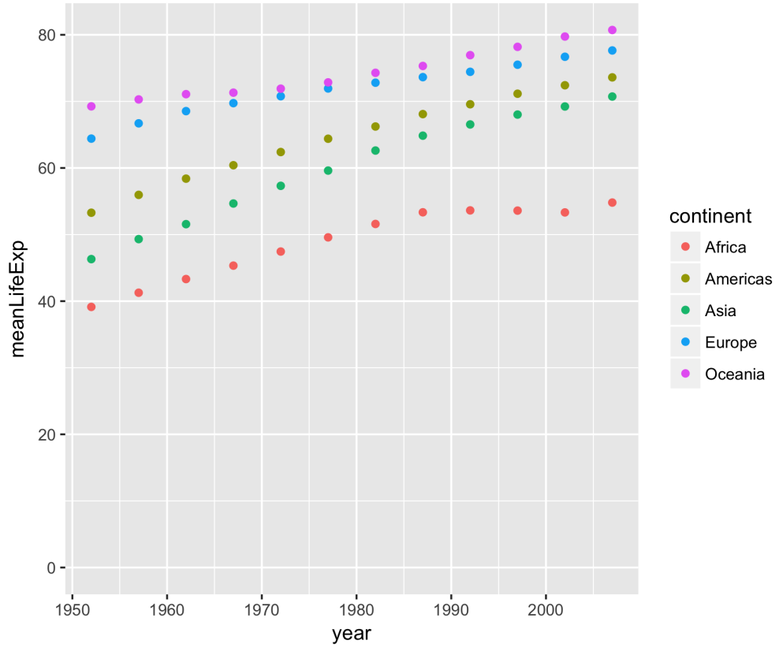
Histogram



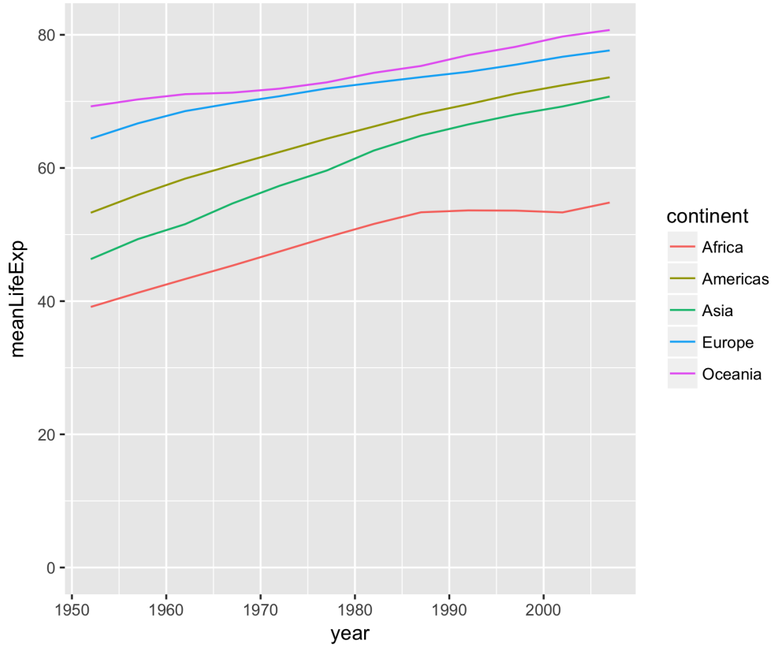
Box plot



Scatter vs line plot

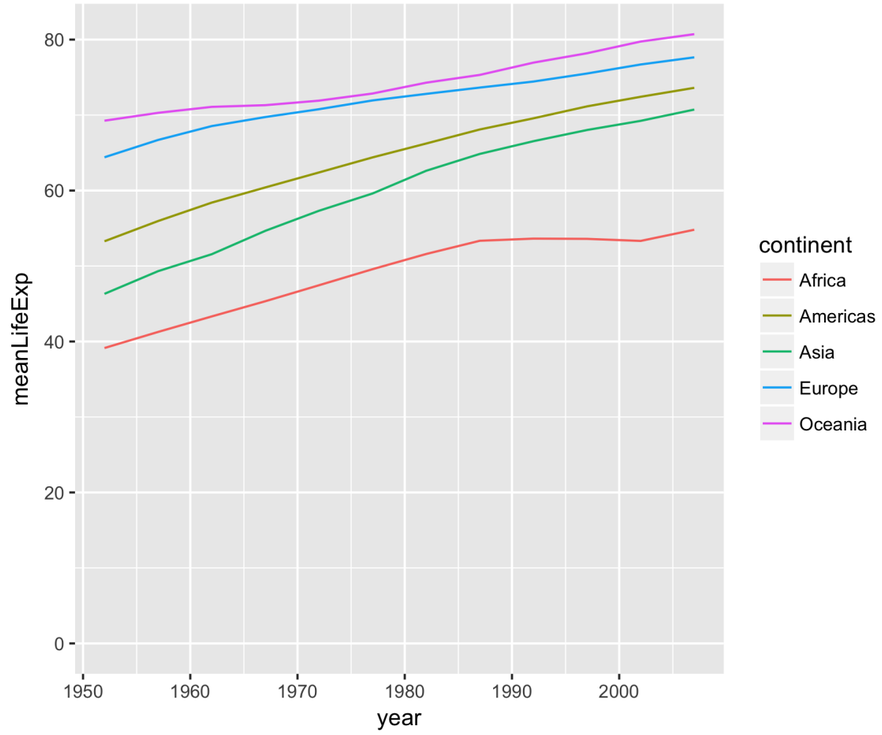


`geom_point()`



`geom_line()`

Line plot



```
ggplot(year_continent, aes(x = year, y = meanLifeExp, color = continent)) +
  geom_line() +
  expand_limits(y = 0)
```

Let's practice!

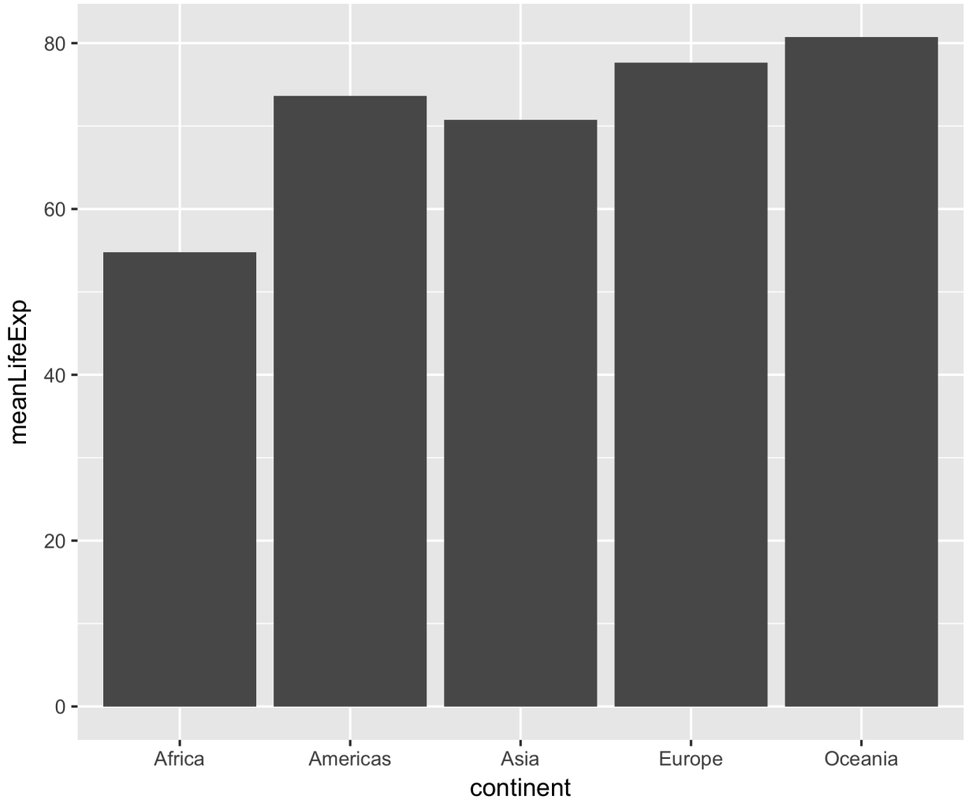
Summarizing by continent

```
by_continent <- gapminder %>%
  filter(year == 2007) %>%
  group_by(continent) %>%
  summarize(meanLifeExp = mean(lifeExp))

by_continent
```

```
# A tibble: 5 x 2
  continent meanLifeExp
     <fctr>       <dbl>
1    Africa    54.80604
2  Americas    73.60812
3      Asia    70.72848
4    Europe    77.64860
5   Oceania    80.71950
```

Bar plot



```
ggplot(by_continent, aes(x = continent, y = meanLifeExp)) +
  geom_col()
```

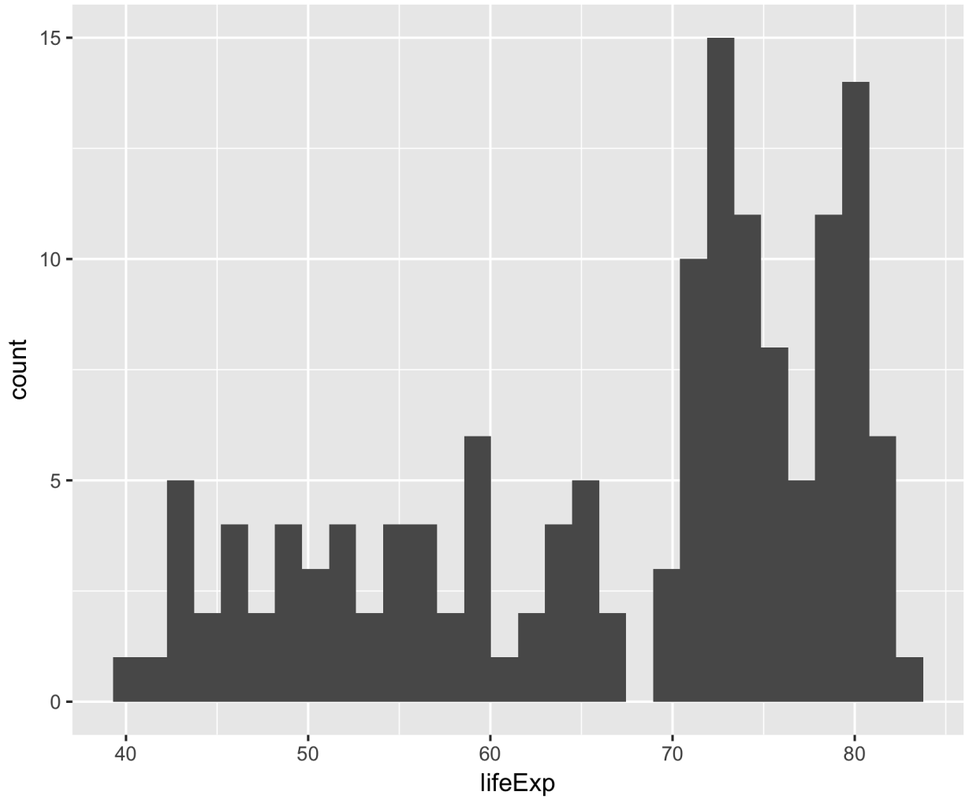
Histograms

INTRODUCTION TO THE TIDYVERSE

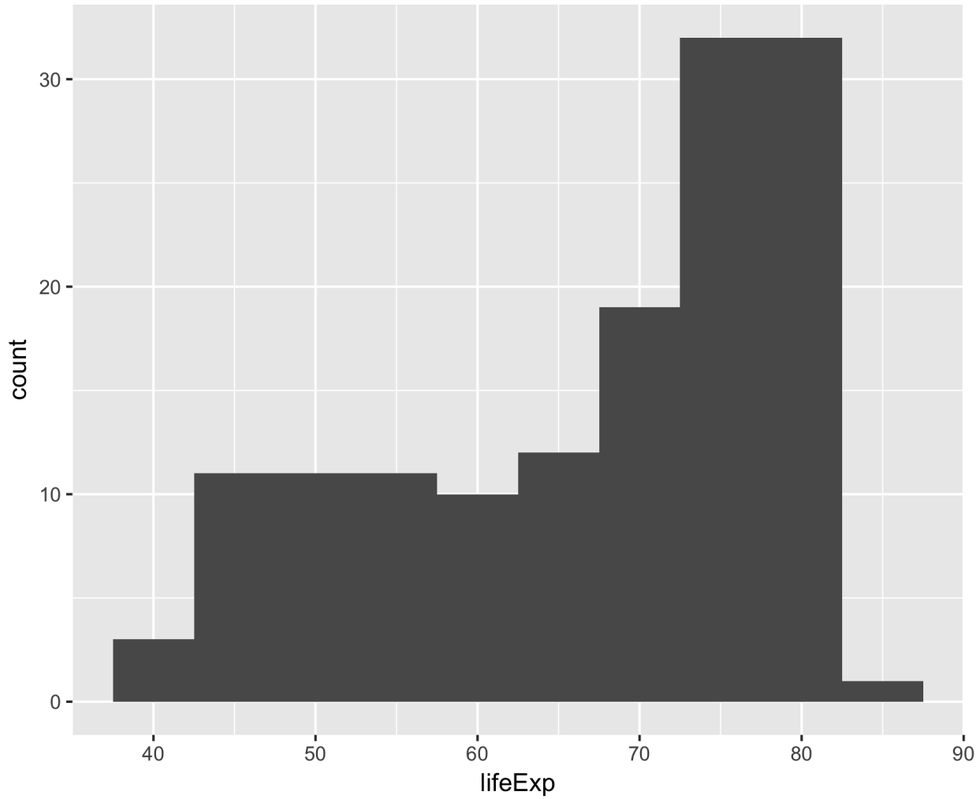
David Robinson
Chief Data Scientist, DataCamp

Histogram



```
ggplot(gapminder_2007, aes(x = lifeExp)) +
  geom_histogram()
```

Adjusting bin width



```
ggplot(gapminder_2007, aes(x = lifeExp)) +
  geom_histogram(binwidth = 5)
```

Log x-axis

```
scale_x_log10()
```

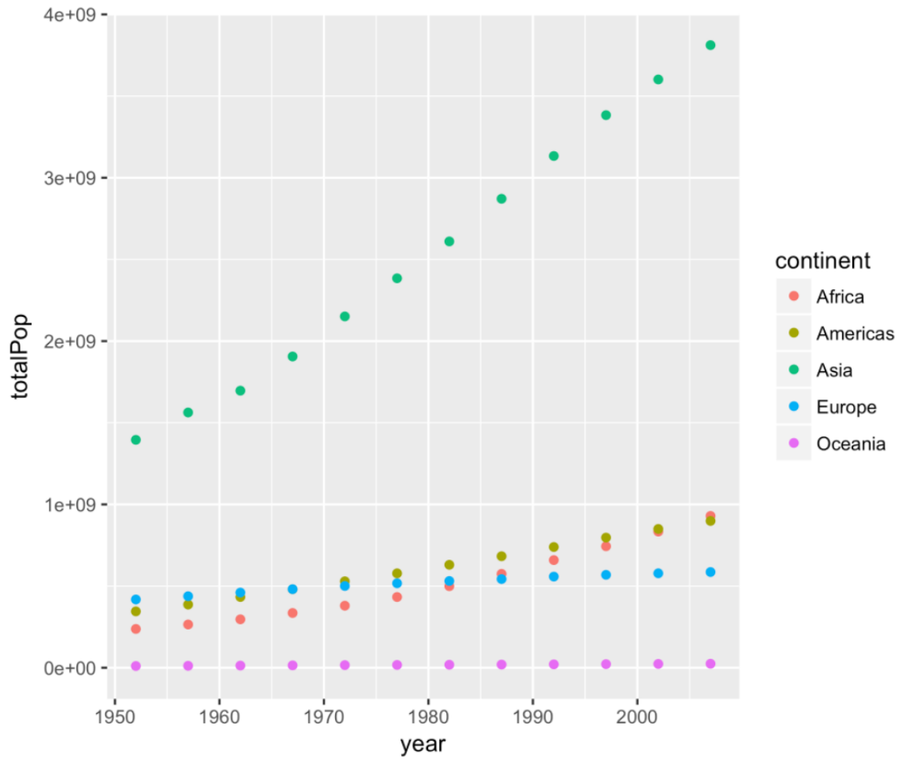
Transforming and visualizing data with R

```
ggplot(by_year_continent, aes(x = year, y = totalPop, color = continent)) +
    geom_point() +
    expand_limits(y = 0)
```



Next steps: Data visualization

- Data Visualization: **Data visualization with `ggplot2`**
- Data Manipulation: **Data manipulation with `dplyr`**
- Importing and Cleaning: **Importing and cleaning data**
- Practice! **Exploratory Data Analysis in R: Case Study**
